EDUCATION

Northeastern University

MS in Game Science and Design · Boston, MA

Sep 2024 – May 2026

- **Coursework:** Game Mechanics · Player Experience · Level Design · Data-Driven Player Modeling · Game Analysis · 3D Modeling

Art University of Iran

BFA in Cinema Studies · Tehran, Iran

Sep 2016 – Feb 2021

PROJECTS

Debt Rush — Developer / Designer / UX Research · Unity · 2-Player Co-op Action Game · Capstone Project

Spring 2026

- Implemented core gameplay in Unity/C#: local multiplayer input via the Input System, the weapon system (equip, aim, fire, collision), and enemy AI behaviors (target detection, movement constraints, state handling).
- Built the shop and inventory UI and the menu and HUD layouts with Unity UI Toolkit (UXML/USS/C#).
- Designed the city map with distinct regions and a tutorial area, placing enemies, NPCs, and loot across the map.
- Ran playtesting sessions with usability surveys and used the findings to improve UI feedback and gameplay clarity.

The Up-Grader — Gameplay Programmer / Systems & Level Designer · Unity · 2D Action Platformer

Spring 2025

- Programmed core gameplay with Unity Visual Scripting: combat, player movement, abilities, progression, and the checkpoint and respawn system.
- Built enemy and combat systems: ranged enemy AI (chase, positioning, attack), tiered enemy types with escalating stats and attack patterns, and loot drop tables.
- Designed the level from blackout to tile painting, placing enemies, resources, and checkpoints across the map.

Classroom 404 — Designer / Artist / UX Research · Unity · First-Person Puzzle Game

Nov–Dec 2024

- Designed and developed a puzzle game from concept to the final build, implementing level design and mechanics in Unity.
- Worked on the environment art, lighting, and post-processing effects to shape an atmospheric, unsettling tone through the game's spaces and visuals.
- Ran structured playtesting (think-aloud and post-session interviews) to improve the gameplay and adjust level difficulty.

WORK EXPERIENCE

Graduate Assistant — Northeastern University, College of Arts, Media and Design · Part-Time

Sep 2024 – May 2026

- Created content across the program's website and social platforms, managed the online community of students and alumni, assisted with organizing program events, supported program presence at industry conferences, including GDC booth preparation and coordination.

Environment Designer — Genius Slackers · Contract · Unreal

Feb 2024 – Apr 2024

- Designed and implemented level layouts in Unreal, building new city zones and layered navigation routes, to expand the open-world map, in NounishPunk, an action-adventure indie game.

Cinematic Artist — Ifa Tasvir Studio · Full-Time · Unreal

Jan 2023 – Aug 2023

- Contributed to eight episodes of the Javanmardan 3D animated series, creating sequences in Unreal, working on camera setup, blocking, environment, lighting, particles and post-process effects, to final render, in collaboration with directors.

SKILLS AND TOOLS

Game Dev: Unity · Unreal Engine · C# · C++ · Visual Scripting

Creative Software: Maya · Substance Painter · Figma · Premiere Pro · Lightroom · Photoshop

Data & Analysis: R · SQL · Python · Tableau · Excel · Qualtrics

Version Control: SVN · Git

Project Management Tools: Trello · Jira · Miro

Skills: Gameplay Programming · System Design · Level Design · UI Design · Cinematic Design · Data Visualization · User Research · Design Documentation · 3D Modeling
