

Sadaf Nezameddini

Game Developer & Designer

Boston, MA | sadaf.nzm@gmail.com | sadafnezam.github.io | github.com/sadafnezam | linkedin.com/in/sadaf-nezameddini | sadafnezam.itch.io

SUMMARY

Game developer working across programming and design, with a background in film studies and storytelling. I build gameplay systems, game AI, and player mechanics in Unity and Unreal, and design levels and core gameplay loops.

SKILLS

Programming: C#, Unity Visual Scripting, Python, R

Engines & Tools: Unity, Unreal Engine, UI Toolkit (UXML/USS), Input System, Git/GitHub, SVN, Jira, Figma, Adobe Premiere Pro

Design & Research: Systems & level design, game AI, usability testing, playtesting, survey design (Qualtrics), data analysis (Tableau, R)

EXPERIENCE

Environment Designer (Contract) — Nounishpunk

Feb 2024 – Apr 2024

- Extended the open-world city map, designing new zones integrated with the existing areas.
- Implemented level designs in Unreal Engine and playtested for accessibility across different player movement types.
- Built layered navigation routes for added exploration depth, kept flexible for future features and missions.

Cinematic Artist — Javanmardan (3D animated series)

Jan 2023 – Aug 2023

- Created cinematics for eight episodes in Unreal Engine, handling camera, blocking, environment, and lighting in collaboration with directors.
- Handled full scene assembly through final render, including particles and post-process effects.
- Built procedural crowd systems via Visual Scripting, including spawning, randomization, and rule-based behavior.
- Worked within a studio production pipeline using Jira and SVN version control.

SELECTED PROJECTS

Debt Rush — Developer / Designer / UX Research · Unity · MS Capstone, 2026

- Two-player asymmetric co-op action game. Built local multiplayer input (Input System), shop and inventory UI (UI Toolkit), weapon systems, and enemy AI; designed the city map; ran playtesting with usability surveys.

The Up-Grader — Gameplay Programmer / Systems & Level Designer · Unity · 2025

- 2D Metroidvania. Programmed core gameplay in Visual Scripting (combat, enemy behavior, movement, abilities, progression), ranged enemy AI, tiered enemy types, loot systems, and the checkpoint/respawn system; designed the level layout.

Also: Classroom 404, Patterns Please, Bacteria, The Rhythm Project, Sweet Escape, Die if You Can.

EDUCATION

M.S., Game Science and Design — Northeastern University, Boston, MA · 2026

B.F.A., Cinema Studies (Screenwriting Concentration)
